About Us

Pgeon is an alternative parcel delivery service in Malaysia with low shipping costs that enables customers to pick up and drop off parcels not only from their home address but also from retail outlets or convenience stores.

We launched the concept in January of 2017 as "Pgeon Point". The concept is designed to streamline the last step of the delivery process between sender and receiver. Customers no longer have to worry about missing a parcel or rushing to the post office after hours. By putting our customers first, the delivery process becomes a more personalized and intuitive experience.

With now over 4000 Pgeon points in Malaysia and growing, we aim to enhance your parcel delivery experience with the added benefits that come with our parcel delivery service.
